Overview:

I hold a PhD in Economics from the University of Jordan, which is considered one of the top Jordanian universities. I am currently working as an economist in the Ministry of Industry and Trade, in the Industrial Observatory Department, in cooperation with UNIDO. Professional in econometrics. Panel and time series data, using Stata and E-views, as well as SPSS. My field of work is in both international trade and industry, and I am interested in economic development and gender I possess the academic and research skills, and aspire to develop a new econometric model in international trade, especially for low-income and endowment-intensive countries.

Professional Experiences

Economist:

From November 2018 till now (Full time)

Ministry of Industry, Trade and Supply, Amman.

- Working on building a portal for the Jordanian industrial database compared to Arab and international countries.
- Participation in the preparation of the first Jordanian industrial competitiveness report.
- Managing and following up the implementation of value chain reports for a number of selected industrial sectors, with the aim of supporting and developing these sectors, particularly with regard to gender and youth.
- Preparing studies related to supporting local exports and its impact on the Jordanian economy from a macro point of view.
- Preparing economic studies related to international trade using the smart model according to the simulation tool supported by the World Bank, in order to support decision makers in building international trade agreements.
